

Luc Castera is a curious software engineer, always trying to learn new technologies and improve his skills. He is currently the lead-developer behind ShareMeme.com and has held positions at Verizon, GE, and Delphi Electronics. He has used many different languages and platforms such as Java, Tcl/Tk, C, Ruby, and C#/.NET throughout his career. He discovered Ruby two years ago and has been a big fan ever since.

Sponsored Speakers

Hal Fulton has two degrees in computer science and twenty years of industry experience. He is the author of [The Ruby Way](#), now in its second edition, and has contributed material to two other Ruby books. He started learning Ruby in 1999 and is still learning it. He promises the world he will never write a web framework.

The leader in
Ruby and Rails deployment
is also the leader in Ruby and Rails
open-source innovation
